

CULTURE & TOURISM: Exploring the culture and heritage of Rogaland.

This study tour will give you a brief insight into the culture and heritage of Rogaland as a Norway in miniature. The tour will start with lunch and visit to Rogaland Art Museum, continue to the Sword in rock monument of Norwegian unity 1100 years ago, and then look into important stages in the history of the area: herring fisheries, sailing vessels, canning industry, oil and gas industry, and also visit a regeneration area: from traditional industry to culture and residence. The tour concludes with a tour to the old fire watch tower in the centre of the city of Stavanger: contrasting features in an old port. Along the route there will be surprises in the form of artistic performances.
