 - a. Presentation
 - b. Questions
- 3) Discussion
- 4) Final comments
- 5) Conclusions

RELEVANT QUESTIONS TO THE SUSTAINABLE DEVELOPMENT GROUP

Of particular interest to the Sustainable Development Group is Section 2 of the Draft Maritime Policy Green Paper, “Retaining Europe’s Leadership in Sustainable Maritime Development”. This section of the Draft Green Paper raises the following key questions of relevance to the Sustainable Development Group’s work:

- 1) What mechanisms should be in place to ensure that new maritime development is sustainable?**

- 2) How can maritime policy contribute to maintaining our ocean resources and environment?**

- 3) What further steps should the EU take to mitigate and adapt to climate change in the marine environment?**

- 4) How can innovative offshore renewable energy technologies be promoted and implemented?**

- 5) How can energy efficiency improvements and fuel diversification in shipping be achieved?**
